#### C. RATIONALE FOR THE SCHEME OF ARRANGEMENT

- Transferor Companies and Transferee Company are engaged in same segment of business. Hence, under this Scheme, the Amalgamation of the Transferor Companies into the Transferee Company would enable the Transferee Company to consolidate all the business activities pertaining to the said Transferor Companies into one single entity i.e. the Transferee Company. Further, the management of the Transferee Company would be strengthened as the management of the Transferor Companies and the Transferee Company would be clubbed into the Transferee Company, which would thereby ensure effective management of the affairs of the Transferor Companies and Transferee Company subsequent to their amalgamation. The said amalgamation would also result in streamlining the group structure especially by combining all of them into one single entity and would provide several benefits such as easing the regulatory, statutory and compliance requirements of all the companies and would also work to the advantage of the shareholders of the Companies as the said amalgamation would result in rationalizing the costs/expenses incurred.

- The amalgamation will contribute in furthering and fulfilling the objectives and business strategies of the companies thereby accelerating growth, expansion and development of the respective businesses through the Transferee Company. The amalgamation will thus enable further expansion of the Transferee Company and provide a strong and focused base to undertake the business more advantageously. Further, this arrangement would bring concentrated management focus, integration, streamlining of the management structure, seamless implementation of policy changes and shall also help to enhance the efficiency and control of the Transferor Companies and Transferee Company.
- Further, the independent operations of the Transferor Companies and Transferee Company leads to incurrence of significant costs, duplication of administrative & establishment costs and the amalgamation would enable economies of scale by attaining critical mass and achieving cost saving and better financial management of resources. The amalgamation will thus eliminate a multi-layered structure and reduce managerial overlaps, which are necessarily involved in running multiple entities and also prevent cost duplication that can erode financial efficiencies of a holding structure and the resultant operations would be substantially cost-efficient. This Scheme would result in simplified corporate structure of the Transferee Company and its businesses, thereby leading to more efficient utilization of capital and creation of a consolidated base for future growth of the Transferee Company.
- The Amalgamation of Transferor Companies and Transferee Company will create synergy benefits for the stakeholders of both the companies and it shall optimize the valuation of the consolidated Transferee Company. The amalgamation would also increase operational efficiency and integrate business functions.
- The proposed arrangement will provide greater integration and flexibility to the Transferee Company and strengthen its position in the industry, in terms of the asset base, revenues and service range.
- The other benefits of the proposed amalgamation include:
  - I. Optimum and efficient utilization of financial resources and rationalization of capital, resources, assets and facilities;
  - II. Enhancement of competitive strengths including financial resources;
  - III. Obtaining synergy benefits;
  - IV. Better management and focus on growing the businesses;
  - V. Reduction of overheads, administrative, managerial and other expenditure.
